£25.50 dc. £3.25

Hornady/Pacific Powder or Lead Shot Bushings
£6.00 each dc. £2.25

Hornady's 366 GA Auto Progressive reloading machine is the ideal for the high volume loader. The time-tested design being based on the Pacific 366 with many additions and improvements makes it the leader in the top quality reloading machine market. With the Smooth Gas Assist feature it can now be used for fast reloading 2½" .410 cases, as well as all other gauges. It's automatic indexing plate can be unlocked so that a faulty case can be easily removed. Loaded cases are automatically ejected behind the press, and now don't have to be removed manually. There are powder and shot shut-offs under the bushing bar so that you can close either when down loading. These features plus many others make the NEW Hornady 366 GA a very versatile reloading press.
