

# CLAY TARGET WADS

## Super Class GUALANDI Wads

V-Zero 23/25 Spark 26

**Gualandi V-Zero 25 & 23.** Both wads are a complex high quality design. The **V-0 23** is designed for 32 gram loads in a 70 mm PT case and the **V-0 25** for 28 gram loads. Both have "V" raked walls and double "O" self adjusting compression unit helps reduce felt recoil to a minimum. **V-0 25** has a multi-pin gas dispersing cup, it keeps the wad on top of the propellant letting the expanding gases maintain a radial sealing pressure on the powder cup walls. To prevent gas leakage the both V-0 wads have a secondary seal at the base of the shot cup just in case of any damage caused to the first one in the loading process. This makes sure you have consist and hard hitting close pattern. **V-0 25 £12.50/500 V-0 23 £12.00/500 either p&p £8.50**

REX 27

**Gualandi SPARK or REX** wads are made to hold only 24 grams of Lead shot in a 70 mm PT case and are the ideal wad for the reloader. They features a deep powder cup, strong compression unit to help stop dipped re-crimps with light loads, and they also have a double gas seal system. These special features lend themselves to high velocities and consistent shot to shot ballistics. They can also be used with modern medium volume powders without loss of column height. **Spark or Rex Wads £14.50/500 p&p £8.50**

**Gualandi SUPER-G SPREADER** wads have been made to give consistant open patterns at relatively close range. This is useful when hunting in woods or for first shots from a single barrel auto or pump gun. In 12ga they hold 32 grams of Lead shot in a 70 mm case and, 24 grams in a 20ga. They reload like a standard wad. It is recommended for maximum effectiveness not to use shot sizes larger then 2.4 mm, also to avoid crushing the centre spreader rod when loading and closing your case. For the greatest breadth of spread it is better to use a roll turnover closure instead of a star crimp. **12ga £6.50/250 20ga £6.50/250 either p&p £7.00**

## Gualandi 20 gauge Target Wads

Super-G 25 & 21 15

Most plastic wads available for 20 gauge are designed to hold 24g to 30g of lead shot and, are for use in 70mm PT cases. Gualandi wads currently available are the Super-G 15 for 28 grams Lead shot and Super-G 25 & 21 for 24grams. The S-G 25 has a gas disperser in the powder cup. As more types of non-toxic shot are now available, new kinds of 20 bore wads will becoming available. New designs for steel shot are in stock, made by Helarco called VP91, which is capable of holding 20g Steel or Tin, 26g Bismuth, 28g High Performance POWER SHOT or 30g Lead shot.

**H25 £13.00/500 H21 £12.00/500 H15 £12.00/500 either p&p £7.75**

## B & P Wads

B&P [Bashieri & Pellagri of Italy] range of wads are now back in stock. Z-18 for loading 36 grams, Z-21 for 32gr, & Z-24 for 28gr of lead shot in a 70mm PT Case.

Made from the finest quality of plastic having a controlled 4 post compression unit between the powder and shot cups. All the B&P wads have an axial gas sealing powder cup giving good gas pressure retention.

**B&P Z-18 £19.00/500 Z-21 £13.00/500, Z-24/14/500 p&p £8.50 for 500 or £10.85/1000**

## Budget Price CGR DC28 Wads

Clay&Game Reloaders have introduced a budget price double compression 12 gauge 28 gram wad. It's size is 42/18 mm but can be compressed down to 36 mm giving a load flexibility of 28 up to 32 gram for lead shot loads. It has treble gas sealing rings to maintain gas pressure even if one is damaged when loading.

**CGR DC28 £12.00/500 + £8.50 or £20.50/1000 + plus delivery £10.85**
