

# Degradable Wads and Fillers

**Fibre wads** are made from a man-made fibrous material impregnated with a mix of bitumen and paraffin wax. Most are capped top and bottom with a thin paper cover. This helps prevent shot from becoming embedded in the fibre while under acceleration forces. Available in all gauges from 28 through to 12ga, in lengths from 10 to 20 mm.

- WAD1249 12ga 18mm Capped fibre £14.00/500 p&p £7.00
- WAD1251 12ga 21mm Capped fibre £14.50/500 p&p £7.75

- WAD286 28ga 12mm Genuine Waxed Felt £21.00/250 p&p £4.25

**Capped Cork Fillers** are now available in 2 & 4mm for 12, 16, 20, 28 and .410 gauges. Cork fillers can be placed on top of a hard fibre wad under the shot to give a cushioning effect. This helps improve shot patterns. 28ga cork wads can be placed inside 12 & 20ga plastic wad shot cups to increase column heights for a good crimp. 12ga fit inside 10ga plastic wads.
